## CAREER OBJECTIVE

Full stack web developer, with strong skills in Ruby on Rails, and React. I have a passion to learn and develop my skills as a developer to create practical applications in and out of the workplace.

## TECHNICAL SKILLS

**Development:** Ruby, Ruby on Rails, JavaScript, React, Redux, CSS, HTML, Bootstrap  
**Platforms:** Windows 10, Ubuntu/Unix  
**Software:** Adobe Photoshop, Blender, Visual Studio Code

## PERSONAL PROJECTS

### Smarta MARTA App, Ruby, Sinatra, Bootstrap

- An application that utilizes MARTA's transportation API to accurately determine the ETA of an incoming train.
- Filters all incoming trains by station, rail-line, and direction of travel
- Allows users to create an account and save personal station preferences based on rail-line and/ or direction of travel

### Mindful, Ruby, Ruby on Rails, JavaScript, Bootstrap

- An application that tracks a user's moods to help the user to make correlations between their mood and activities.
- Plots a user's history of moods on an scalable graph, and allows the user to view the frequency of their moods.
- Allows the user to view all moods, with the ability to filter through their history to help find correlations.

### Bootstrap Form Creator, Ruby on Rails, React, Redux

- An application that allows the user to create forms in-browser to copy/paste the HTML for faster development.
- Forms are styled with Bootstrap to streamline the development process for the user
